# Glorioso QRT

**Glorieuses 2009**  
IOTA AF-011 - DIFO FR-004  
September 14 to October 5, 2009  
**FT5GA**

September 14, 2009

The FT5GA team landed safe on late Saturday, at Saint Denis de la Reunion Airport. While this week end, the members of the crew spent some time to check and finalize the laptops and the Wintest soft. They were heard doing that on the bands, barefoot, on Sunday using CW and RTTY, from Sainte-Clotilde.

This morning the departure to Mayotte is scheduled around 09:00 local time. Then they will fly to Glorieuses, were they are expected to land around the end of the afternoon. To night I'll call them by satellite cell phone to know approximately when they will begin to traffic.

The Higher Authorities of the Territory and the other from the French Forces presence on the island, may delayed that a little bit. So it seems reasonable to expect the first signals on Tuesday in the morning. (GMT time)

By the way I will thank all of our pilots and friends who are ready QRV to collect all the useful information to permit us the best traffic organization. Jeff, F6AQJ did a good job and send it us, about propagations predictions, Floyd is ready to receive and transmit us all what will be useful for the Whole American Continent. We know the poor conditions to day for the FT/G/Americas way so with the pilot help we will try to be as top as possible for them. This morning, Lee, ZL2AL sent us some predictions for the VK/ZL area. The Middle and Far Asian observation are awaited, and will come soon.
